DIGITAL INDUSTRIES SOFTWARE

Simcenter Testlab Nodelocked Value Pack (60 & 30 tokens)

Simcenter/TL-DTP.05.2 & TL-DTP.06.3/2406/20240430

Product Information Sheet

Summary

With the Value Licensing option, the Simcenter Testlab Desktop offers an extra degree of flexibility for making available as much as possible of the Simcenter Testlab product capabilities to the largest possible user group at an optimal cost. The Value Pack licensing mechanism is supported by most of the Simcenter Testlab software applications. Each token enabled Simcenter Testlab software application will not require the associated product license, but will consume a number of tokens during runtime of the application (number of consumed tokens de-pending on the product), making these tokens available again when the application is closed.

SIEMENS

BENEFITS

- Ensures to always be allowed to start any Simcenter Testlab application on a given computer (if enough tokens are available)

FEATURES

- Provides a pool of tokens that will be consumed at runtime by the token-enabled Simcenter Testlab products.

- The capability of supporting value based licensing is indicated in the Product Info Sheet of the respective Simcenter Testlab products.

- Can be combined with specific product licenses. In that case, the product license will be consumed first, and only the tokens when no product licenses are available anymore when starting another instance of the same product.

- Can be combined with any number of supplementary value packs (option)

- Can be node-locked to a dongle for usage in mobile testing/acquisition applications

The Simcenter Testlab Nodelocked Basis Value Pack provides a pool of tokens that are usable on a single system, hence allowing to exploit/explore on a single system the broad variety of Simcenter Testlab products and applications without requiring a full set of licenses for each of these products.

Products and Option

- TL-DTP.05.2: Simcenter Testlab node-locked basic value pack (60 tokens)
- Additional tokens : TL-DTP.06.3: Simcenter Testlab node-locked supplementary value pack (30 tokens)

Product requires

- TL-DTP.21.1: Simcenter Testlab Desktop – Advanced
  or
  TL-DTP.20.1: Simcenter Testlab Desktop – Standard
  or
  TL-DTP-0010: Simcenter Testlab Desktop Neo
  or
  D-P06.02.1: Simcenter Tecware Desktop
  or
  D-P06.01.1: Simcenter Tecware Load Data Processing

Product Status

- Available on PC running Microsoft Window OS:
  - 64-bit Windows® 10 and Windows® 11 (Please check installation Manual for details versions)
  - Limited support (non-acquisition products) for Windows Server® 2016, 2019 and 2022, excluding CAD display
